About Me

I am a product-minded Software Engineer who loves bringing ideas to life. With a deep interest in innovation-driven entrepreneurship and UX, I approach software development through a human-centered lens. Whether I'm building for the web, mobile, or desktop, my goal is always the same: to design and engineer engaging, scalable applications that people actually love to use.

Education

2020 – 2025/12
Dhahran

B.S. in Software Engineering
King Fahd University of Petroleum and Minerals

Professional Experience

2026/06 – Present
Dammam, Saudi Arabia

CTO
Abser - Nonprofit Organization [🔗](#)

- **Architected and deployed a full-scale custom ecosystem** (Financial Management, Admin Portal, Website) to replace a legacy third-party ERP, significantly reducing costs and streamlining operations.
- **Engineered a robust accounting module and interactive KPI dashboards**, driving the association's digital transformation and empowering data-driven decision-making.

2025/08 – 2026/02
Dhahran, Saudi Arabia

Tech Committee Leader
KSA Energy Week [🔗](#)

Led the technical committee for Energy Week 2, overseeing website development.

2025/06 – 2025/08
Tianjin, China

International Intern
COSL, China Oilfield Services Limited [🔗](#)

Developed a comprehensive conference room management system.

Projects

Semsem [🔗](#)

A comprehensive B2B SaaS platform for veterinary clinics to streamline patient records, appointments, and billing, featuring an AI-powered clinical copilot.

COSL meeting [🔗](#)

Conference Room Management & Meeting System. A web application developed during a 2-month summer internship at COSL in China.

Rukn, Senior Project [🔗](#)

Rukn is an app that recommends optimal rental locations for entrepreneurs by analyzing demographics, competition, and nearby services.

More projects and details can be found in my portfolio <https://muhannad.site> [🔗](#)

Skills

Fullstack Web Development

React.js, Next.js, JavaScript/TypeScript

Mobile Application Development

React Native, Flutter

Desktop Application Development

.Net, C#, javaFX

Software Design

Object-Oriented Design (OOD), UML, Design Patterns, UX/Human-Centered Design.

Machine Learning & AI

Supervised Learning (Regression, SVM, KNN), Ensemble Methods (Boosting/ Bagging), Neural Networks (Backpropagation, Gradient Descent)
